*Century, the two time Agribition Grand Champion Bull, has sired many great ones. Son's have sold for \$35,000 \$25,000, and \$20,000. JD Lann loved the incredible power Century stamps into his calves and purchased his son Masterpiece in 2003. We continue to use Century in our AI and ET programs and have paid top dollar for his semen.*

## B **RED BRYLOR 40X BAILEY 50K**

*JD Lann used Bailey in our flush program with great results. A full brother to Brylor's signature cows "40X" & "54Y" whose embryos have sold all over the world, Bailey is regarded very highly by Bryan & Sherry Mackenzie who refer to him as "Dynastar's Replacement" - a pretty bold statement considering he has paternal brothers such as Youngblood, Sawyer Brown and DMM Dynastar.*

*Red Brylor Bodasius 79K is a great mating between the growth and power bull Bodacious 693, which produces some of the best sons available and one of the most awesome female producers in the beef industry, and the famed "40X" cow of Brylor Ranches. She has produced over \$172,200 worth of progeny in her career.*

79	840	1620	+5.9	+41	+71	+16	+36	

*Fargo, turning 9 this spring, has done it all and gets more popular with age. His sons have excellent gainability, like the '02 Cdn. Angus Gold Show Bull of the Year, Phoenix, whose amazing 4.72 lbs ADG topped Brylor's 2001 bull test. His females have strong feet & legs, perfect udders, awesome longevity and produce productive & profitable offspring.*

*This is a well balanced, heavily used sire was produced by Howard & Wendy Schneider of Northline Angus and has done an great job for many breeders! I remember being very impressed with this deep bodied, heavy muscled young sire the first time I saw him in 2002 at Farmfair. Rob Roy was undefeated on the show road in Canada that fall and was Reserve Senior Champion in Fort Worth at the National US Show.*

80	679	1326	-3.4	+27	+47	+19	+33	

Rainman started out at an 80 lb birth weight and a 115 weaning index. JD Lann purchased him as a calving ease sire and he has more than lived up to our expectations. He calves easily, yet adds very respectable performance into his progeny. As an added bonus, his calves display very sound feet and legs; something we strive hard to build into our program.

His dam is a maternal sister to New Trend 22D. We'll see his daughters milking this year and, from the look of their udders, they should follow traits of one of the highest milk bulls in the breed.

## H RED JD LANN ALLADIN 303N

MALE LANN 303N 1172981 MARCH 3 2003

**SIRE:** RED GLACIER LOGAN

BW	205D	365D	2006 EPDs	BW	WW	YW	Milk	TM
81	ET	ET	+1.7	+29	+60	+13	+28	

Alladin comes from a very unique genetic combination. The sire Mr. Marbling, traces back to the great Eleanor cow, whose progeny has gathered more than \$320,000 U.S., including King Rob, None Better and Mario. The dam 12E, is one of the breeds top females and flushed heavily by JD Lann. You will hear more of Debbie's progeny now and in the future.

**WE DELIVER!!**

Just jump in your car and come on sale day and leave the driving up to us.

**FREE DELIVERY** within 100 mile radius of Red Deer, Alberta, prior to May 1, 2006.

88	890	1380	+5.5	+43	+65	+25	+47	

*Code Red is a long sided, deep-bodied performance bull with moderate birth weights out of a very maternal Boomer daughter. His bull calves have huge hips and testicular development. His daughters are long, feminine and chalk full of red meat with lots of eye appeal. He was the 1999 Red Roundup Club Red Champion and the Reserve Bull Calf Champion at Farm Fair.*

## RED BRYLOR 4S STALLION 101N

MALE LMP 101N 1174004 JANUARY 21 2003

83	696	1220	+1.7	+29	+60	+13	+28	

*This awesome Stallion son is out of 54J, a \$5100 purchase in the 2nd "MB Magic" Sale to 4 Seasons Red Angus. On sale day his weight was 1480lbs with a 38.5 cm scrotal measurement. We used Stallion on heifers the first year with good success and used him in 2005 on cows and heifers. His calves are born easily and are long and are impressive to watch as they are born smaller but by weaning they are the heaviest sire group.*

94	909	1393	+6.0	+42	+67	+20	+41	

Masterpiece was undefeated Bull Calf Champion in 2002 and Reserve Junior Champion Bull at Agribition 2003. Many good cowboys believe he would have been a strong contender in 2004 as well, but unfortunately met his untimely death just before the shows.

Masterpiece saw heavy use at both JD Lann and Gold-Bar and is the second largest sire group in JD Lann's offering. His calves consistently show extra volume, added length and superior hair coats. We will definitely continue to use him a great deal in our program.

## **L** RED BRYLOR PHOENIX 16K

Phoenix was high gaining bull for Brylor in 2001. He went on to be the 2002 Canadian Gold Show Bull of the Year and has bred on remarkably well. Sons and daughters have topped sales nation wide. The two very stylish sons on offer today, will add performance to any program.

### **“SIGHT UNSEEN PURCHASE PLAN”**

We look forward to seeing you on sale day, but if you can't be with us and wish to participate, please feel free to phone Robin, Trent or Derek or any of the sales staff to discuss our “100% Satisfaction Guaranteed” Sight Unseen Purchase Plan.

# EPD EXPLANATION

## EXPECTED PROGENY DIFFERENCES (EPDS)

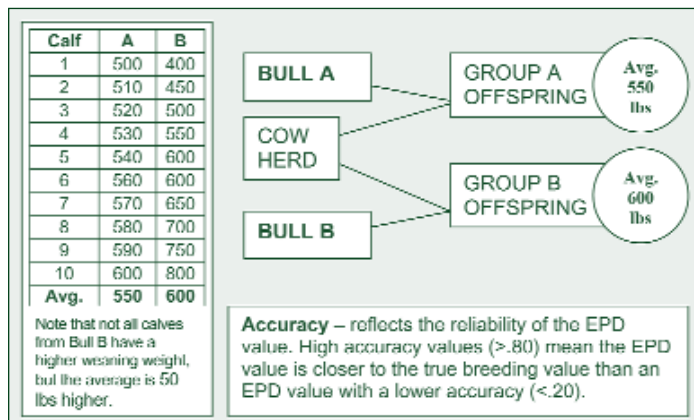

Statistics generated for individual cattle through national genetic evaluations.

### EPDs:

- ✓ allow breeders to estimate a young animal's breeding value as a parent
- ✓ allow a fair comparison of breeding value by removing environmental bias such as climate, feed and special management
- ✓ best tool available to compare animals between herd, countries and year of birth
- ✓ help breeders make informed decisions regarding breeding stock selection by evaluating numerous traits such as growth-related traits (BW, WW, YW, Milk), carcass (REA, FAT, %IMF, etc.) and reproductive efficiency (CE, MCE, SC)
- ✓ estimate the group performance of one parent compared to the group performance of another parent, *assuming similar mates*

**EPD's evaluate group averages and offspring's performance. They can not predict individual performance or weights.**

For example, if Bull A (weaning weigh EPD of +10) and Bull B (WW of +60) were randomly mated with ten similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs. lighter than that of Bull B's (60 - 10 = 50).

EPD averages for 2005-born Red Angus calves	
	Red
BW	0.9
WW	28
YW	47
Milk	14
TM	27
CE	3.9
MCE	2.8
SC	
REA	n/a
FAT	n/a
%IMF	n/a
STAY	9

To evaluate seedstock, use EPDs, pedigree and visual assessment. With EPDs, the concept of “intermediate optimums” works best. Selection for one trait or for extremes generally results in unexpected consequences due to genetic correlations - for example, intense selection for high yearling weight will also increase birth weight. Successful cattle breeding requires a thoughtful and balanced approach to optimize fertility, growth and carcass merit while improving profitability and efficiency.
